Summary:

Up and coming Full Stack Web Developer experienced with a wide range of technologies such as, JavaScript, jQuery, CSS, HTML, Node, Express and MySQL. Who loves finding the best solution to any problem. New technology is never an issue when you're always the first to learn it. A master at explanations on the highest level and the lowest. Keeping composure and staying organized in a chaotic scene is second nature. For example, during my first group project one of my teammates and I found a way to refactor our JavaScript to shorten it by over 150 lines and make it vastly more readable. I'm looking forward to being part of a high-quality team that is dedicated to making high-quality products.

Technical Skills:

HTML | CSS | JavaScript | jQuery | Bootstrap | Node.js | Express | MySQL | MacOS | Windows | Linux | iOS | Android | Microsoft Office

Projects:

Password Generator: Page: https://kevinhenleycode.github.io/Password_Generator/

GitHub: https://github.com/KevinHenleyCode/Password_Generator

- Generates a random password based on the user's choices
- Assumed all roles for this project
- HTML/CSS/JavaScript

Group Project 1: Page: https://kevinhenleycode.github.io/Group_Project_1/

GitHub: https://github.com/KevinHenleyCode/Group_Project_1

- Takes in two APIs and uses them together to translate text and filter unwanted words. Then takes those words and puts them through a text to speech generator that can be summoned with a button click.
- Was one of two JavaScript developers
- HTML/CSS/JavaScript/jQuery/Bulma

Work Day Scheduler: Page: https://kevinhenleycode.github.io/Work_Day_Scheduler/

GitHub: https://github.com/KevinHenleyCode/Work_Day_Scheduler

- Lets the user input events for the current day by the hour. Then tells them whether the event was in the past, present or future
- Assumed all roles for this project
- HTML/CSS/JavaScript/jQuery

Experience

Stock Associate

- **Cost Plus World Market** - The Woodlands, TX
- November 2020 to Present
